*The Invention of Hugo Cabret*

Brian Selznick  
Scholastic 2007  
Hb ISBN 0439813786

This beautifully presented book is a novel that depends equally on words and pictures. Half the story is told by means of exquisite, finely detailed pencil sketches on black pages, plus stills from the silent films of Georges Melies, a magician and the creator of 500 films including the first science-fiction film, *A trip to the moon*. Much of the book is based on the later life of Melies, the rest of this mystery being invented. And what an invention it is! It tells the story of young Hugo who lives secretly in the walls of a Parisian railway station, taking care of the station clocks. A treasured notebook, a stolen key, a missing uncle, a mysterious message from his dead father and Hugo's struggle for survival all combine to make a haunting, fast-paced mystery. This book would appeal to all from middle-primary to secondary. SF
